

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

THIS book has been prepared for the purpose of simplifying the study of arithmetic and of fixing its facts in the memory.

It includes work for the second half of the sixth year, divided into five main parts, corresponding to the months of the usual school term. Each of these parts is again divided into twenty groups of problems, corresponding to the usual number of school days in a month. One half of the oral and the written work in each group of problems will require for completion the attention of an average class for about thirty-five or forty minutes.

Each month's work is preceded by an outline of the topics to be studied, in which the new work is distinguished from the rest by being printed in full-faced type.

Provision is made for frequent reviews, including rapid calculations in the fundamental processes and examples in the most important parts of the arithmetic previously studied. By this means a proper perspective of the subject is maintained.

While most of the material has been selected for pupils of average ability, additional problems are given for pupils of advanced standing. These problems can be used also for variety, when pupils are required to go over the grade work a second time.

2. Find 35 % of 695 lb.
3. Find 12 % of \$2105; $\frac{2}{3}$ % of $\frac{5}{8}$ yr.
4. Find 27 % of \$6723; $16\frac{1}{4}$ % of \$480.
5. Find the sum of the following and express the result in words : 2370.12, 59.63, 487.85, 10042.63.
6. Find 30 % of 44; 25 % of 140 lb.
7. Find 30 % of 8736 bu. ; 40 % of 1200 men.
8. Find 105 % of \$5728; 75 % of 16400 yd.
9. Find 7 % of \$648.
10. Solve and express the result in words : $(224.6298 \times .027) \div 426$.

II**Oral.**

How many hundredths of anything is 40 % of it? 60 % ? 125 % ? $8\frac{1}{3}\%$? $18\frac{3}{4}\%$? what fractional part?

What per cent of a number is $\frac{9}{10}$ of it? $\frac{8}{9}$ of it? $1\frac{1}{2}$ times it? $\frac{1}{20}$ of it? $\frac{1}{50}$ of it? (Call the number of which you take the per cent the base.)

What fractional part of a number is 10 % of it? 20 % of it? 60 % ? 80 % ? 50 % ? 25 % ? 75 % ? $12\frac{1}{2}\%$? $37\frac{1}{2}\%$? $62\frac{1}{2}\%$? $87\frac{1}{2}\%$? $33\frac{1}{3}\%$? $66\frac{2}{3}\%$? $16\frac{2}{3}\%$? $83\frac{1}{3}\%$? $14\frac{2}{3}\%$? $11\frac{1}{3}\%$?

What is the result obtained by multiplying the base by the rate called? What is the base? What is rate per cent? What is percentage?

What part of a number is $\frac{1}{2}\%$ of it? $\frac{1}{3}\%$ of it? $\frac{1}{4}\%$?

1. What is $\frac{1}{2}\%$ of \$5600?
2. A broker invested \$560 and gained $12\frac{1}{2}\%$ of his money. How much money has he now? *
3. I had \$240 in the bank and in January put in 25 % of that amount. How much had I in the bank at the end of the month?
4. A shepherd who had 360 sheep, bought $16\frac{2}{3}\%$ more. How many had he then?
5. How many pint bottles can be filled from a hog-head containing 63 gal. ? _____

* SUGGESTED EXPLANATION: If he gained $12\frac{1}{2}\%$ or $\frac{1}{4}$ of his money, he now has $\frac{5}{4}$ of his money (the original amount) + $\frac{1}{4}$ of it (the gain) or $\frac{6}{4}$ of \$560.

6. What is $12\frac{1}{2}\%$ of 480? $\frac{1}{2}\%$ of 800?
7. A man who received \$30 a week, had his salary raised 30%. How much did he receive after the raise?
8. A man had \$250 and gave 60% of it to his son. How much did his son receive?
9. If $\frac{5}{8}$ of my money is invested in a farm, $\frac{1}{4}$ in railroad stock, and the remainder, which is \$500, is deposited in a bank, how much have I in all?
10. If 1 A. of land yields 14 bu. 3 pk. of cranberries, how much should 40 A. yield?

Written.

1. Find $\frac{3}{8}$ of 824 ft.; 105% of \$600.
 2. Find 64% of 127 A.; 19% of \$27.
 3. Find 6% of \$140 + 9% of \$160 + 23% of \$175.
 4. Find $11\frac{1}{8}\%$ of \$3283.47.
 5. Find $\frac{1}{8}$ of $4\frac{1}{2}\%$ of $\frac{5}{8}$ of a ton. (Give the answer in pounds and ounces.)
-
6. A man who had a hogshead of cider (63 gal.) lost $15\frac{1}{2}\%$ of it by leakage. How many gallons did he lose?
 7. Find 25% of 6 yd. 2 ft. 6 in.
 8. If iron ore yields 63% of pure metal to the ton, how much iron is there in 16 T. of ore?
 9. Find the sum of $246\frac{1}{2}$, $250\frac{1}{3}$, $783\frac{1}{4}$, $210\frac{2}{3}$, and $200\frac{7}{8}$.
 10. Mr. James Downing, who owns $\frac{2}{3}$ of a mine, sells $\frac{3}{4}$ of his share for \$6000. What is the value of the whole mine?

How many hundredths of a number is 6 % of it? 8 % of it? 15 %? 40 %? 75 %?

What per cent of a number is $\frac{8}{100}$ of it? $\frac{8}{100}$ of it? .07? .16? .35? $.62\frac{1}{2}$?

Give another name for per cent.

If you take 5 % of a number, how many hundredths of the number do you take?

Find 5 % of 200 gal. What is 1 % of \$500? $\frac{1}{2}$ % of \$500? 25 % of 200 ft.? $\frac{1}{4}$ % of 200 ft.?

1. James had \$24 and spent $\frac{1}{2}$ % of it. How much did he spend?

2. The cost of the wood for flooring a hall is \$250, and the labor to lay and dress it adds 60 % to the cost. What is the total cost?

3. I bought $2\frac{1}{2}$ lb. of sugar in one store and $3\frac{1}{4}$ lb. in another. How many pounds did I buy in all?

4. If $\frac{7}{8}$ of a load of hay is worth \$14, how much are 2 loads worth?

5. How many half pints are there in 2 gal. ? in 1 qt. ?

6. Find $\frac{3}{4}\%$ of \$1200.

7. A boy who received 50¢ a week pocket money had it increased 50% when he was 16 years old. How much did he get then?

8. If 72¢ is paid for 18 lead pencils, how much are they worth a dozen?

9. If a man pays \$4 for 5 bu. of grain, how much is a peck worth?

10. If $\frac{3}{8}$ of a dozen bananas cost 20¢, how much will $\frac{5}{8}$ of a dozen cost?

Written.

1. Mr. Brown commenced business with \$1500 capital, and gained 8% the first year. What amount was he worth at the end of the year? *

2. The cotton crop of a planter last year was 450 bales; this year it is 12% more. What is his present crop?

3. The population of Massachusetts in 1900 was 2805345; it increased in 10 yr. 20%. What was the population in 1910?

4. A dealer bought 10 automobiles at \$750 each, and sold them at a profit of 20%. How much did he gain?

5. Sixty-two and one half per cent of a township (36 square miles) is prairie. How many acres of land in the township are prairie?

6. A man paid \$420 for his taxes and 12% more for repairs. What was the amount paid for both?

* SUGGESTED METHOD: 100% of money at first + 8% of money increase = 108% of his money. 108% of \$1500 = ?

7. If the bread made from a barrel of flour (196 lb.) weighs $33\frac{1}{3}\%$ more than the flour, what is the weight of the bread?

8. A house and lot bought for \$3750 increased in value $112\frac{1}{2}\%$. How much were they then worth?

9. Find $33\frac{1}{3}\%$ of 127 gal. 3 qt. 1 pt.

10. At \$15 a barrel (200 lb.), find the cost of beef for a regiment of 1000 men for 30 days, allowing each man 1 lb. 8 oz. daily.

7. A grocer sold flour for \$8.40 a barrel, which was $16\frac{2}{3}\%$ more than he paid for it. How much did he pay for it?

* SUGGESTED EXPLANATION: Since John had $16\frac{2}{3}\%$, or $\frac{1}{3}$ more than George, and George had $\frac{2}{3}$ of his own money, they had together $\frac{2}{3} + \frac{1}{3}$, or $\frac{3}{3}$, of George's money. Therefore $\frac{2}{3}$ of George's money = 35¢. Hence $\frac{1}{3}$ of George's money = $\frac{1}{3}$ of 35¢, and $\frac{2}{3}$ of George's money = $\frac{2}{3}$ of 35¢.
